RESEARCH INTERESTS

Digital platforms & marketplaces · tax & tariff incidence · digital advertising · user-generated content · causal inference

EDUCATION

Ph.D. in Marketing

2022 – 2027 (expected)

WU Vienna University of Economics and Business, Austria

Advisor: Prof. Dr. Nadia Abou Nabout.

M.Sc. in Economics

2019 – 2022

University of Mannheim, Germany

B.Sc. in Economics

2014 – 2019

Middle East Technical University (METU), Ankara, Turkey

Cum Laude. Minor in Business Administration. Exchange semester at the University of Groningen (2018–2019).

WORKING PAPERS

Acun, I., Kasinger, J., and Abou Nabout, N.

“Who Bears the Burden of Digital Service Taxes?”

Job Market Paper — under review at Marketing Science

Digital service taxes (DSTs) were designed to make Big Tech pay. Using an advertiser-level Google Ads panel—16,532 advertisers across 29 European countries—and Google’s staggered rollout of DST surcharges, we show the tax is passed through near-completely to local advertisers: ad prices rise by 3.4%, almost exactly the 3.2% statutory rate, while quantities stay flat. The first causal estimate of DST incidence in digital advertising.

Abou Nabout, N., Acun, I., Kaiser, M., and Liaukonytė, J.

“Not so De Minimis: Tariffs and Cross-Border Trade on Online Marketplaces”

Under review at Marketing Science

Exploiting the 2025 U.S. suspension of the \$800 *de minimis* duty-free rule as a natural experiment, we show the online marketplace shrinks by roughly 6%—mostly lost cross-border sales rather than redistribution to domestic sellers; foreign sellers lose 13–16% of weekly units sold.

Grzadziel, A., Acun, I., Brand, M. L., Ruckelshausen, S., and Abou Nabout, N.

“The Dupe-licity Effect: Does Viral User-Generated Content Help or Hurt Premium Brands?”

Work in progress — targeting Journal of Marketing / Journal of Marketing Research

Combining 500K+ TikTok videos, LLM-based product extraction with human validation, and difference-in-differences on retail sales panel data, we find viral “dupe” videos do not cannibalize premium brands’ revenue—they extend it by roughly three extra weeks of sales per product-country each year.

CONFERENCE PRESENTATIONS

INFORMS Marketing Science Conference, Lisbon, Portugal <i>Not so De Minimis: Tariffs and Cross-Border Trade on Online Marketplaces</i>	2026
ZEW Conference on the Economics of ICT, Mannheim, Germany <i>Who Bears the Burden of Digital Service Taxes?</i>	2026
